PROFESSIONAL EXPERIENCE

Frontend Developer @ Smile Train

An international nonprofit that supports 100%-free cleft repair surgery and comprehensive cleft care for children globally.

07/2019 – 09/2023 // New York, NY

- As the web team's only dedicated frontend developer I designed, coded, and maintained website content on Smile Train's domestic and international sites on Drupal, using HTML, CSS/SCSS, and Javascript, ensuring responsive design and standardized UI.
- Created wireframes and mockups to guide design, functionality, and accessibility of new pages with Adobe XD and Figma.
- Built and designed an app that generates email signatures with React, which was deployed to staff of 150+ employees.
- Designed 2023 online annual report using Figma, and built out using React and Tailwind, while working with internal stakeholders to gather requirements based on technical and UI/UX needs.
- Worked with external and external stakeholders to help migrate and rebuild our site (including multiple international sites) on Drupal 9.

Freelance Graphic Designer

06/2017 – 06/2019

- Designed t-shirts for e-commerce business using Adobe Photoshop and Illustrator, generating over \$250,000 in revenue.
- Designed logos for small businesses.

Program Associate @ International Child Resource Institute

An international nonprofit focused on early childhood education.

03/2013 – 08/2015 // Berkeley, CA

- Developed new digital strategy, resulting in increase in website traffic x2, in Facebook likes x5, and Twitter followers x8.
- Created new website using Squarespace, increasing daily web traffic, and designed graphic content with Photoshop & Illustrator.

PROJECTS

Codelingo

- Collaborated with 4-person team to build an app (React, Redux, Google Firebase) that uses quiz games to teach users Javascript
- Lead the visual design and front-end flow of React components.

Planet Plant

- Collaborated with 4-person team to create e-commerce website, built with React, Redux, PostgreSQL, Express, Node, OAuth, Stripe API.
- Took ownership of the visual design with CSS (Grid and Flexbox) and implemented the cart payment system using Stripe's API.
